Honorable & Mentionable . . .

W. W. Trobaugh has closed shop after doing business on the Southern Illinois University-Carbondale campus for 40 years.

He retired a couple of weeks before his 93rd birthday because, he says, "my legs are wearing out."

Trobaugh, a student at SIU when it was still called "The Normal" in 1898-99, operated his campus store since 1932, selling snacks, soda pop and candies to students and staff members. In one location he used to sell gasoline, too, but had to take the pumps out when SIU began expanding and highway 51 was re-routed away from his business.

SIU bought that property and then Trobaugh's own home, and has provided him a store space inside the main campus ever since, the only such commercial enterprise on University land. He has paid rent to the state.

His most recent and final stand was in the lobby of Woody Hall Office Building. Before that he did business in one end of a temporary barracks, but that was torn down in 1969 to make way for a new classroom-office building.

Trobaugh, who was 93 on Nov. 30, taught in rural schools, farmed and worked at a Carbondale railroad tie plant before he opened Trobaugh's Store. Two sons, Carl '48 and Earl '31, graduated from SIU and a third son, Gordon, attended Southern. Trobaugh's first wife died in 1951, and in 1963 he re-married at the age of 84. He was Sunday school superintendent of the Pleasant Grove Methodist Church for 51 years before giving up the post in 1969.

Students and faculty members spanning four decades learned to expect Trobaugh's amiable "Thank you, come again" every time they bought an item from the tiny store. Trobaugh said it for the last time at 4 P.M. Nov. 10 and went home to give his legs some rest.

Additions and renovations at the Student Center have enabled the building to be utilized to its fullest potential. Pictures and copy beginning on page 2 outline the changes.

Are you fighting the battle of the bulge that hits many after the holidays? If so, Dr. Frank Konishi, chairman of SIU's department of food and nutrition, shows five exercises and the time required for each one to work off a certain number of calories. Weight watchers will love this article, adapted from his new book, starting on page 6.

Books and Trips at Reduced Rates! As a member of the Alumni Association, you are eligible to take advantage of some truly great offers. Go to Hawaii at a veritably low cost (see back cover for details) and watch for announcements of more trips. Scan our books selected just for you at a 20% discount (pp. 10-13). We've added a new book, *A Nickel's Worth of Skim Milk*, to this month's offering, so be sure and check it often as different books are added and dropped from the list.

Student Center Addition:

The \$8½ million addition to the Student Center represents an expansion project that has tripled the size of the facility.

A blueprint rundown of the renovations and additions include:

A sub-ground level 225-seat facility equipped with a wide variety of food and drinks available from 18 vending machines. Designed with rustic features and dim lighting, the area has a centrally located stage for entertainment.

On the ground floor, a new Bookstore nearly three times the size of the old space greets students at the North end of the building, and a fully-carpeted Billiard Room occupies the old Bookstore. Further down the corridor, a set of high speed escalators carries people to the first and second floors. For those who want a hamburger and a shake or just a cup of coffee, a new 250-seat Snack Shop is ready and waiting. For those desiring a broader menu, the south addition encloses a completely new Cafeteria and Service Area. This facility consists of two main dining areas, each seating 450 customers; and a "scramble" serving system that allows you to pick and choose your food as if you were in a supermarket. The southern dining area was planned to overlook a new outdoor terrace. A first for the Student Center is adjacent to the new south entrance . . . a 24-hour self-service Postal Station.

With the construction of additional food service areas, a series of twelve Meeting-Dining Rooms with varying seating capacities from 10 to 40 are available at the north end of the first floor. Two lounges are located on this floor. Facing Thomp-

Photo by Charles Daugherty

Photo by Charles Daugherty

Versatile, Contemporary, Spacious

son Woods, a 150-seat Dining Room, with table service, provides all of the niceties expected at a fine restaurant. This floor also houses the new Administration and Business offices for the Student Center. Part of the area is devoted to a Ticket Office, where tickets to all SIU events are sold. A second Ballroom was finished under this project and adds to the present meeting and dancing capacity. In the south addition, another new feature is a 300-seat Auditorium. To allow more convenient access to these areas, a new east entrance was created, complete with escalators from the street level.

A large part of the second floor is devoted to a complex of offices for Student Organizations and Meeting Room facilities. The Student Activities area located on this floor consists of both individual offices and a large space for secretarial and clerical functions. A unique Music Listening Lounge and Browsing Library is at the north end of the floor. In this room, students may read for pleasure . . . scanning periodicals or catching up on the hometown news with local newspapers, all of this while listening to special selections of "piped-in" music.

The entire third floor is devoted to creative activity use. This essentially is a large open space designed for flexibility of use and capable of a wide variety of spaces for either large or small groups on a temporary basis. Being the highest floor in the building, it also affords a pleasant view of the campus and surrounding buildings.

So, You Can't Believe You Ate The Whole Thing, Huh?

by Frank Konishi

Do you suffer from “post-holiday blues” in January or “pre-bikini blues” in June? If you do, you are probably typical of thousands of individuals fighting the battle of the bulge and wondering what can be done to become as slim and trim as you were when you were younger.

Basically, the major reasons why people become overweight as they grow older are a reduction in rate of metabolism and a decrease in physical activity, without a corresponding decrease in total calorie intake. Since you can't do too much about your rate of metabolism, you should either eat less or exercise more (or both) to lose or maintain weight. If you enjoy eating, however, proper exercise may be the method of choice for you to expend or “burn” those extra calories.

While many forms of exercise are available, the preferred type will vary from one person to another. Some of the factors to consider in selecting a particular exercise are: simplicity—one that doesn't require special skills or equipment; sensitivity—one that can be done in the privacy of your home or immediate vicinity; and sensibility—one that isn't too strenuous (seek the advice of your physician). Examples of exercises which fulfill the above requirements and which can be used singly or in combination for any body weight-control program are—walking, stepping, bicycling, jogging and swimming.

How long should you exercise? Should you or shouldn't you eat that extra piece of cake? To help you decide, a table of exercise equivalents has been developed as shown on the next page. The table tells you which exercise and how long to exercise to use an equivalent number of calories in a given food. The figures, which are adapted from a book to be published soon by the SIU Press, are designed to take temptation out of the hands of fate and place it in *your* hands where *you* can decide—to eat or not to eat!

Exercise Equivalents of Foods

Minutes Required at the Exercises Listed to Expend Calories in the Foods

| FOOD | CALORIES | ACTIVITY | | | | |
|---|----------|--------------------|---------------------|----------------------|--------------------|---------------------|
| | | Walking Minutes | Stepping Minutes | Bicycling Minutes | Jogging Minutes | Swimming Minutes |
| Apple, 1 medium | 87 | 17 | 12 | 11 | 9 | 8 |
| Bacon, crisp, 2 slices | 96 | 19 | 13 | 12 | 10 | 9 |
| Banana, 1 medium | 127 | 24 | 17 | 16 | 13 | 11 |
| Beans, green, ½ cup cooked | 15 | 3 | 2 | 2 | 2 | 1 |
| Beer, 8-ounce glass | 115 | 22 | 15 | 14 | 12 | 10 |
| Bread and butter, 1 slice | 96 | 18 | 13 | 12 | 10 | 9 |
| Cake, white layer, 1/16 of 9" cake | 250 | 48 | 33 | 31 | 25 | 22 |
| Carrot, raw, 1 large | 42 | 8 | 6 | 5 | 4 | 4 |
| Cereal, dry, 1 cup, with milk and sugar | 212 | 41 | 28 | 26 | 21 | 19 |
| Cheese, American, 1-ounce slice | 112 | 22 | 15 | 14 | 11 | 10 |
| Cheese, cottage, 1 rounded tablespoon | 30 | 6 | 4 | 4 | 3 | 3 |
| Chicken, fried, ½ breast | 232 | 45 | 31 | 28 | 23 | 21 |
| Chicken, TV dinner | 542 | 104 | 72 | 66 | 54 | 48 |
| Cola beverage, 8-ounce glass | 105 | 20 | 14 | 13 | 11 | 9 |
| Cooky, chocolate-chip, 1 average | 50 | 10 | 7 | 6 | 5 | 5 |
| Cooky, vanilla-wafer, 1 average | 15 | 3 | 2 | 2 | 2 | 1 |
| Doughnut, 1 average | 125 | 24 | 17 | 15 | 13 | 11 |
| Egg, boiled or poached, 1 medium | 78 | 15 | 10 | 10 | 8 | 7 |
| Egg, fried or scrambled, 1 medium | 108 | 21 | 14 | 13 | 11 | 10 |
| French dressing, 1 tablespoon | 57 | 11 | 8 | 7 | 6 | 5 |
| Gelatin, with cream, 1 serving | 117 | 23 | 16 | 14 | 12 | 10 |
| Halibut, broiled, 1 serving | 214 | 41 | 28 | 26 | 21 | 19 |
| Ham, fresh, 2 slices cooked | 254 | 49 | 34 | 31 | 25 | 23 |
| Ice cream, 2/3 cup | 186 | 36 | 25 | 23 | 19 | 17 |
| Ice-cream soda, 1 regular | 255 | 49 | 34 | 31 | 26 | 23 |
| Ice milk, 2/3 cup | 137 | 26 | 18 | 17 | 14 | 12 |
| Malted milk, 8-ounce glass | 500 | 96 | 67 | 61 | 50 | 45 |
| Mayonnaise, 1 tablespoon | 100 | 19 | 13 | 12 | 10 | 9 |
| Milk, skim, 8-ounce glass | 88 | 17 | 12 | 11 | 9 | 8 |
| Milk, whole, 8-ounce glass | 160 | 36 | 21 | 20 | 16 | 14 |
| Milk shake, 8-ounce glass | 420 | 81 | 56 | 51 | 42 | 38 |
| Orange, 1 medium | 73 | 14 | 10 | 9 | 7 | 7 |
| Orange juice, 4-ounce glass | 54 | 10 | 7 | 7 | 5 | 5 |
| Pancake, 1, with 2 tablespoons syrup | 204 | 39 | 27 | 25 | 20 | 18 |
| Peach, 1 medium | 38 | 7 | 5 | 5 | 4 | 3 |
| Peach shortcake, 1 biscuit and 1 peach | 266 | 51 | 35 | 32 | 27 | 24 |
| Peas, green, ½ cup cooked | 58 | 11 | 8 | 7 | 6 | 5 |
| Pie, fruit, 1/6 of 9" pie | 400 | 77 | 53 | 49 | 40 | 36 |
| Pie, pecan, 1/6 of 9" pie | 670 | 129 | 89 | 82 | 67 | 60 |
| Pizza, cheese, 1/8 of 14" pie | 185 | 36 | 25 | 23 | 19 | 17 |
| Pork chop, 6 ounces raw | 314 | 60 | 42 | 38 | 31 | 28 |

| Roast beef with gravy | 430 | 83 | 57 | 52 | 43 | 38 |
| Tuna Salad | 278 | 54 | 37 | 34 | 28 | 25 |
| Sherbet, orange, 2/3 cup | 120 | 23 | 16 | 15 | 12 | 11 |
| Shrimp, French-fried, 3½ ounces | 225 | 43 | 30 | 27 | 23 | 20 |
| Spaghetti, meat sauce, 1 serving | 396 | 76 | 53 | 48 | 40 | 35 |
| Steak, T-bone, ½ pound raw | 235 | 45 | 31 | 29 | 24 | 21 |

ENERGY COST FOR 154-POUND INDIVIDUAL

WALKING briskly at 3.5 to 4 miles per hour on the average consumes 5.2 calories per minute.

STEPPING 25 up and down steps per minute facing in the same direction consumes an average of 7.5 calories per minute.

BICYCLING consumes around 8.2 calories per minute.

JOGGING alternated with walking (5 minutes each jogging, walking, jogging, etc.) consumes around 10 calories per minute.

SWIMMING with average skill consumes approximately 11.2 calories per minute.

ADAPTED, WITH PERMISSION, FROM "EXERCISE EQUIVALENTS OF FOOD FOR WEIGHT WATCHERS" BY FRANK KONISHI, PH.D., SOUTHERN ILLINOIS UNIVERSITY PRESS (1972)

LA & S Separates

A College of Science formed initially of seven departments in the College of Liberal Arts and Sciences, has been approved for the Carbondale campus by the SIU Board of Trustees.

The action breaks up the 19-department College of Liberal Arts and Sciences into two separate units.

Departments which have asked to affiliate with the new College are botany, chemistry and biochemistry, geology, microbiology, physiology, physics and astronomy, and zoology.

News of the Campus

The board said other science-related LA and S departments which haven't sought realignment can stay in their present home if they choose. They are mathematics and computer science.

Other departments now included in LA and S—later scheduled to be shortened to the College of Liberal Arts—are anthropology, English, foreign languages, geography, geology, government, history, linguistics, philosophy and sociology. Programs in religious studies and social welfare also are offered through LA and S.

The biological sciences group, according to the board, operates on a current budget of \$3,055,982, largest in the College. The board agreed with SIU-Carbondale Vice-President for Academic Affairs Willis Malone that management of the existing College of LA and S has become "extremely complex."

Career Development

SIU at Carbondale has been designated by the Illinois Division of Vocational and Technical Education

Elbert Hadley, former associate dean in the College of Liberal Arts and Sciences, has been appointed dean of the newly-formed College of Science. The appointment is effective until July 1. During that time a College of Science search committee will screen nominees for the permanent position.

as a center to develop career education personnel. State funds are provided for project support.

The Division is allocating approximately \$124,000 to support a series of pilot training and program development activities through the 1972-73 academic year. Involved will be the training of occupational and career education teachers, vocational administrators, career guidance personnel and support staff.

SIU at Carbondale is one of two statewide centers established and supported by the Division. The other is Chicago State University.

The contractual agreement between SIU and the Division comprises seven sub-contracts involving specific activities. The programs, all now in operation, with sponsoring units and principal investigators listed, are:

Training Programs for Occupational Administrators (two sub-contracts) \$63,000, department of occupational education and department of educational administration and foundations—Wayne Ramp and James Parker.

Pre-Service Training Programs for Teachers of Environmental Occupations (two sub-contracts) \$13,000, department of occupational educa-

tion—Thomas Stitt.

In-Service and Pre-Service Training for Teachers of Career Education Orientation (one sub-contract) \$15,000, department of occupational education—Dennis Mystrom.

Pre-Service Training for Cooperative Education Teachers of Disadvantaged (one sub-contract) \$8,000, department of home economics education—Rosemary Carter.

Planning Grant for University Organization Appraisal and Alignment (one sub-contract) \$25,000, Office of the Executive Vice President and Provost—John Baker.

William Applegate, university occupational coordinator in the office of Willis Malone, SIU executive vice president and provost, said the Division of Vocational and Technical Education chose SIU-C for the contract award because of the institution's leading record in this state for production of occupational teachers in the area of business and secretarial education, agricultural education, home economics education and occupational education. He estimated that \$3 million in resources is employed here each year in these fields.

"Faculty and staff in selected areas have distinguished themselves both statewide and nationally in the preparation of career education personnel," he said.

Students to Buy Texts

The 35-year-old Textbook Rental Service is to be phased out starting with the 1973 fall quarter, the Board of Trustees decided in its November meeting.

The board authorized President David Derge to develop a new program for selling new and used textbooks to students and for the purchase of used books from students for resale, and to distribute to appropriate commercial bookstores authorized lists of new and used books which students will be expected to pur-

chase.

President Derge was authorized further to "initiate plans and develop policies for the phasing out of the existing textbook rental service with an objective of terminating the service."

The board, however, stipulated that a "modified" program be continued to assist undergraduate students "by providing a textbook rental program for students enrolled in General Studies courses." Procedures are to be established by the president for determining the rental rate and for assessing of students for each General Studies course. The rental income is to be used for current operating expenses of the service.

Phasing out and eventual termination of the textbook rental service has been recommended by outside consultants and by faculty committees.

The service was established during the Depression of the 1930's as one means of keeping student expenses at a minimum. The fee was \$2.50 per quarter. In 1951 the board established a rental fee for graduate students, but rescinded it in 1963. In 1954, the rental fee was increased to \$5 per quarter and in 1964 to \$8 per quarter for undergraduate students enrolled in 11 hours or more. Subsequent action provided a sliding scale for students taking less than 11 hours.

Bio-medical Computing

Is it possible that a kid just now learning how to count can expect to live 150 years? Or that his kids, to be born around the year 2,000 will entertain a life expectancy of 200 years?

Not only possible, but scientifically predictable, according to the way the average lifespan curve has swung upward in the past 70 years. While the curve will flatten out from time to time, medical breakthroughs not

so far around the corner virtually assure its continued climb.

When medicine discovered what diabetes was all about, when researchers gave doctors antibiotics—each time something like that happened everybody's lifeline stretched a little further.

It will stretch some more when a cure for cancer is developed, and that may well be within the next decade. And the quest for that 150 or 200 year average life-mark is going to be reinforced some more—a good deal more—by the appearance in hospital rooms of our indifferent friend, the computer.

Bio-medical computing is looking more and more like one of those threshold events that may herald a whole bunch of new days for man. For the past five years, Ralph W. Stacy has been a frontiersman in research, at the University of North Carolina and the Cox Heart Institute in Kettering, Ohio.

Now he's set up his electronic research outpost at SIU, where he's been appointed chairman of the physiology department. On a grant averaging \$40,000–\$50,000 a year (from the National Institute of Health), he is using computer systems to see what happens to the body's major "control centers" in times of crisis, or impending death.

Precise monitoring of the body's vital functions in these critical moments can be the key to survival. Computers can do it, Stacy has shown, as no team of physicians could ever hope to. In fact, Stacy has proven by experiment that a computer plugged into the body's control network can predict a fatal breakdown in any part of it with two hours lead time.

That would mean, for example, that a coronary care team wouldn't have to wait until the patient's heart stopped before trying to revive him. The team would know well ahead of time that the heart was about to fail.

Stacy compares these so-called

control systems to the guidance mechanism on rockets. They are intricately related and have to be "read" as a single indicator of the body's condition. Include in this network blood pressure, heart rate, blood flow rate, body acidity, respiration and blood-sugar levels.

Imagine the physician confronted with a case where this whole grid has broken down, say a badly injured car wreck or burn victim. His blood pressure and flow rate may be off the scale; heart rate all but lost to measurement; acid and blood-sugar ratios badly altered by internal organ damage. So many factors are working and clashing with one another that the doctor, no matter how cool and competent, can't observe them all.

Stacy says that lots of people in this shape—severe shock—die simply because there's no human way to keep track of what's going on in their beleaguered control systems.

Enter the computer, constantly scanning the whole control network, programmed to red-flag on a crisis cue, geared to "read out" the situation for human response.

Research so far with humans has been confined to what are called "standard observables," such as blood pressure and heart rate. A problem here, however, is that changes can occur suddenly (and fatally) with no warning at all.

Adding the other vital body-control factors will provide a much more reliable data bank for computers to work with. Stacy has experimented with dogs, and the results are promising.

And with bio-medical computing added to the world's health care inventory, look for people to live longer than heretofore dreamed. The problem, then, will be to put those extra 75 to 100 years to productive, satisfying use.

"Otherwise," says Stacy, "it doesn't really make much difference, does it?"

For Members ONLY—

SIU Press and University Graphics

books at 20% off the published price!

It's only one way you'll benefit from belonging to the SIU Alumni Association.

In an effort to be of greater service to its members, the Alumni Association is offering books published through SIU at a big savings. A wide variety of subjects was selected for a broad appeal to the alumni body. We hope you will find at least one publication of interest to you or a friend.

As an extra bonus, if you order \$10 or more worth of books, we will send you *Siege and Survival, The Odyssey of a Leningrader* by Elena Skrjabina for only \$1.00 plus \$.05 tax—the regular price is \$4.95. So act now, and get your order in.

Books are shipped immediately upon receipt of order. Inquiries about other SIU Press and University Graphics and Publications books are invited.

A Secret War: Americans in China, 1944–1945

By Oliver J. Caldwell

This inside story of American undercover activities in China during World War II provides unique insights into the operations of Chiang Kai-shek's secret service. Caldwell tells his story not only for historians and government leaders, but because he feels that the "American people should know how disastrous U.S. policy in East Asia has been during this century." The secret war described in the book is the clandestine and sometimes brutal struggle between the OSS and the dreaded secret police headed by the

sinister General Tai Li and the efforts of a "third force"—the Triad of Chinese secret societies—which enlisted Caldwell's efforts to secure American help in ousting Chiang.

The First Freedom

By Bryce Rucker

This book is a substantially documented account of the dangers threatening all mass media through monopoly, chain and cross-media ownership trends. The book focuses particularly on the appalling lack of diversity of voices in the marketplace of ideas. Rucker provides a brief historical base for each medium and service discussed. He examines chain and monopoly control of the print and broadcast media, the monopoly influence exerted by news services and feature syndicates, the problems that plague broadcasting: the rating services, payola and plugola, the sorry conditions of UHF television and FM radio, the stranglehold over TV maintained by the networks, domination by advertising, community antenna television (CATV), subscription television (STV) and noncommercial television. This is a highly valuable book, not only for those interested in the various media, but for every thinking, listening, watching person.

New Earth

By Jack Chen

Illustrated by the Author

Until now, very little firsthand information about Communist China has been available in this country. Of extraordinary importance, therefore, is the story of an early collective farm in East China's Chekiang Province in the 1949–56 period. The county chronicled in this book is Hsinteng County, one of China's 2,082 counties. It offers a typical example of the cooperative movement that swept the Chinese countryside and formed the basis of the Green Revolution, a part of the overall policy drafted by Mao Tse-tung. This volume, now published for the first time in America, will provide the general reader, the student and the China specialist with valuable background information which will broaden the understanding of today's China.

Land Between the Rivers

By C. William Horrell, Henry Dan Piper, John Voigt

Lying in an area bordered by the Wabash, Ohio and Mississippi rivers, the Southern Illinois country is rich in history, folklore, scenery and natural resources. At about the latitude of southern Virginia, and extending from the prairie farmland of central Illinois to the rugged "Illino-

nois Ozarks," called locally the Shawnee Hills, the area is the natural terminal boundary for hundreds of plant species reaching out to all points of the compass. It is also the oldest and more sparsely populated part of Illinois, a region of small towns and independent people, typical of the vast mid-American region of which it is a part—the heartland of the U.S.A.—but with unique qualities, features and attitudes which the authors movingly describe in words and pictures. In black and white, as well as color photographs, and in text, the book portrays the region's physical features, its history, its people, life and customs. An uncommon portrayal of American life in a distinctive region, the book provides a memorable journey both in time and place.

Two Planets

By *Kurd Lasswitz*
Translated by *Hans Rudnick*

This fascinating tale of today, yesterday and tomorrow has for decades captured the imagination of Europeans. The utopian vision and technological fantasy of *Two Planets* has undoubtedly influenced German astronautical thought as well as the fancies of countless readers who have turned from its pages to gaze at the stars and dream of other worlds. In 1897, Kurd Lasswitz, mathematics teacher and philosopher, published a novel about man's first encounter with beings from another planet. Lasswitz's Martians differ little from man physically, but ethically intellectually, scientifically and socially, they are the prototype of the ideal human being. The story revolves around a group of German scientists

who, when seeking the North Pole, come upon a Martian settlement there. The Martians have built an artificial island, adapted to their needs, above which hovers their space station, a giant ring such as twentieth-century astronautical scientists have seriously speculated upon. The action of the story is seen through the eyes of several characters, both Martian and human, and is drawn together by the love affair between a beautiful Martian girl and a member of the exploring party.

The Origins of Civilization

By *Carroll Riley*

For the beginning student and general reader, this brief, concise ac-

count of the great movements in time of culture and civilizations will be especially valuable. Coverage of the Old World and the New in the book is well balanced, and includes much new material. Special chapters are devoted to the more important areas, such as Egypt, Mesopotamia, the Indus, the Levant, Crete, The Greeks, the Western Mediterranean, China, Mesoamerica and the Central Andes. Illustrated with photographs, drawings, charts and maps.

Think Back on Us. . .The Social Record

By Malcolm Cowley
Edited by Henry Dan Piper

This volume illuminates the issues, problems and ideas of the 1930's. Several general essays are included which discuss the familiar themes of the Thirties—communism in its various forms, the pacifist crusade, the crusade against world facism and the collapse of the American economy.

"A rare and exciting collection which makes me want to re-read at least a score of the books from that time"

—William Hogan
San Francisco Chronicle

Think Back on Us. . .The Literary Record

By Malcolm Cowley
Edited by Henry Dan Piper

"The book serves the purpose for which Professor Piper edited it—to give young people some idea of what the Thirties were like. . .One thing undergraduates are bound to learn. . .is that the decade is not to be sum-

med up in a single generalization."

—Granville Hicks

Saturday Review

This book covers the literary world in a detailed, week-by-week fashion, roughly from the stock market crash in 1929 to the Pearl Harbor attack in 1941.

The Illinois Fact Book and Historical Almanac, 1673–1968

By John Clayton

In 1818, when Illinois was admitted to the Union as the twenty-first state, it had three incorporated municipalities and a population of less than 50,000. In its sesquicentennial year in 1968, the prairie state had 1,258 municipalities and over 10,000,000 residents. Why did Illinois grow so rapidly and assume such an important role in the nation's economy? What contributions has the state made to the arts, to the conservation of natural resources, to science, to social work, to recreation and who were the people who helped in the development of Illinois. This book, thoroughly indexed, is the first publication to bring the statistical facts, general information and history together in one book, concisely and authoritatively.

Legends and Lore of Southern Illinois

By John W. Allen

Against the cultural and historical backdrop of southern Illinois, Allen

has written sketches of the people of the region—of their folkways and beliefs, their endeavors, successes, failures and tragedies, and of the land to which they came. It is a land rich in Indian lore and legend, and many reminders of the primitive life remain. There are accounts here of some early homes, taverns, churches, and public buildings. There are stories here of life on the farm, and of slaves and their masters. Today southern Illinois is on the verge of a cultural and industrial renaissance. The area is rich in natural resources. It has become a nationally known recreation center; it supports a distinguished university. In a few years many of the vestiges of its past culture will have disappeared and will survive only in museuma and in the written record. These sketches of John Allen's will be a part of that record.

It Happened in Southern Illinois

By John W. Allen

Included in this book are sketches of the early pioneering days, when wolves were literally chased from the door, stories about the many Indian artifacts discovered among the rolling hills and valleys of the area and articles pertaining to the historic strategic role this region played during the Civil War. Here are glimpses into the past activities of such infamous outlaws as Samuel Mason and the Harpe brothers—who found the area's caves and rivers an attractive location for outlawry—as well as the famous Illinois-born heroes, "Bat" Masterson, "Wild Bill" Hickok and Wyatt Earp. This book can well serve as a reference guide for touring some of the landmarks of historical interest and natural beauty found in abundance in southern Illinois.

A Nickel's Worth of Skim Milk

By Robert Hastings

Life was not easy for the family of a miner in a small Southern Illinois town during the Depression. The area was largely dependent on coal, and when the mines closed, leaving thousands of men without work, the local economy collapsed. Hastings, a 1945 graduate of SIU, remembers this period as it appeared to a small boy. Born in Marion, Illinois, he was six years old when his father announced, "The mine is closed. It's all over." A few days later his parents closed their neighborhood store

because nobody had money to pay for groceries. But if this sounds like a dreary life, the author found it far from that. Friends and relatives—and the City Dairy—shared what they had and offered a hand whenever it was needed. "Visiting" was a source of entertainment, as were picnics, church socials and fishing trips. Laughter and tears are mingled in this book of reminiscences.

Siege and Survival The Odyssey of a Leningrader

By Elena Skryabina
From the Foreword

"When the 900-day siege of Leningrad was finally lifted and the gaunt,

brave survivors had basked a bit in the fitful spring sunshine, the Soviet government made one of its rare graceful gestures to these heroic people. It awarded to the survivors the Medal for Defense of Leningrad. Those who had chanced to come through alive got the medal. In all, more than 300,000 medals were passed out—it may sound like a very large total. But when you consider the fact that something like 3,300,000 persons were trapped within the siege lines when the long blockade began on September 8, 1941, the number is not so large. Of course, between 1,100,000 and 1,500,000 persons died during the siege—of hunger, of cold, of disease, of German bullets, bombs and shells.

"A valuable supplement to books that provide a broader view of Soviet life under Stalin" —*Saturday Review*

In attendance for the official presentation of the Home Economics Constituent Society charter at Carbondale were from left, Thomas Brooks, dean of the School of Home Economics; Kathy Sohn Keim '57, M.S. '65, president of the new constituent society; Ted Taylor '44, president of the SIU at Carbondale Alumni Association; and Larry Jacober '62, M.S. '65, president-elect of the Association. The home economics group is the second society to form on the Carbondale campus under the constituency plan.

Winners of the annual Roscoe Pulliam Memorial Scholarships of \$250 each presented by the SIU at Carbondale Alumni Association include, from left, front row: Dawn Hofer, Carbondale; Eileen O'Brien, Fenton, Mo.; Gayle Butler, Carbondale; Patricia Smith, East St. Louis; Connie Armstrong, Du Quoin; Dorris Bleem, Ellis Grove; Joyce Wabrick, Park Forest; and Beverly Arrington, Alamogordo, N. Mex. Back row: SIU-Carbondale president David R. Derge; Stephen Elliott, Wheaton; Robert Hupp, Naperville; John Stubbs, Overland, Mo.; Stephen Koerber, Park Forest; John Morray, Flora; Joseph Bittner, Evansville, Ind.; Norma Fagan, Midland, Tex.; Darrell Huisinga, DeLand; and SIU Alumni Association president Theodore E. Taylor of Washington, D.C. The scholarship winners who were unable to be present for the photograph were Jeffrey Cole, Chicago; and Jerome Williams, Decatur.

College Adopts Saluki

The Saluki dog, exclusively the mascot of Southern Illinois University at Carbondale for more than two decades, has been adopted by a second institution, Shelby State Community College of Memphis.

"Southern Illinois University and the Memphis area have had a good relationship for many years and, perhaps, this new kinship will be to our mutual benefit," commented Ronald Alford, Public Relations director at Shelby in a letter to Rex Karnes, SIU coordinator of Public Services.

One divergent fact in the selection of the Egyptian hunting dog, said to be the oldest pure bred canine in the world, is that Shelby has adopted the "Saluqi" spelling.

The Shelby Mascot Selection Committee said it based its choice on these points:

"a) Uniqueness: Southern Illinois University is the only other college or university in the country with this mascot, and SIU uses the Americanized spelling of Saluki; b) Identification with the Memphis area; and c) Ease of depiction."

DEADLINE SPORTS

SOUTHERN ILLINOIS UNIVERSITY'S basketballers came away with one tournament championship during the holiday season.

The Salukis captured the Roadrunner Classic in Las Cruces, N.M., beating Xavier of Ohio and host New Mexico State for the title. It was the first time New Mexico State had ever lost its own tournament and only the fourth time in five years the Aggies had lost at home.

The Salukis also participated in two other tournaments, finishing fourth in both the Steel Bowl and Razorback Classics. "We gained valuable experience playing in these major college tournaments," said SIU coach Paul Lambert.

At the beginning of the new year, the Salukis owned a 8-5 record with their latest wins coming over rivals

HAWTHORNE

Evansville (79-62) and Indiana State (78-75).

Nate Hawthorne, 6-4 senior guard, was the Salukis' leading scorer through the first 12 games. Hawthorne, who played forward last season, held a 16.3 mark.

Joe Meriweather, the

6-11 sophomore center from Phoenix, Ala., was a key factor in the Salukis early season success. He owned a 14.3 scoring average and a 10.8 rebound mark and blocked, on the average, five shots a game.

Meriweather had problems staying out of foul trouble, however. He fouled out six times in 12 games with SIU losing three of those games.

"We can't afford to have Joe sitting on the bench," explains Lambert. "Obviously, we play much better with him in there."

Rounding out the rest of the Salukis' scoring attack are 6-3 forward Tim Ricci (11.3 avg.), 6-7 forward George Thompson (10.9) and 6-1 guard Dennis Shidler (8.6).

"We're starting to play good basketball," said Lambert. "We had some early season adjustment problems but appear to have solved those now."

The Saluki junior varsity team wasn't having as much success, however. The junior Salukis went through their first five games without a win. Guard Rickey Boynton led the team in scoring with a 16.0 average, while A.J. Willis followed with a 15.8 mark.

THE SIU WRESTLING TEAM returned from its eastern trip winning one of four dual meets. The Salukis beat Maryland, but lost to Navy, Lehigh and Iowa.

There were some happier moments in the Illinois Invitational, however. Joe Goldsmith at 118 pounds, Ken Gerdes at 134 and Don Stumpf at 158 each won individual titles.

Those three also had the best individual won-lost records for coach Linn Long following the Christmas break. Goldsmith

who is just a freshman, was 6-2, Gerdes was 4-3-1 and Stumpf was 5-2-1.

Long looks at his current squad as one that will mature as the season progresses and reach its top strength in time for the year-end tournaments.

"The team's strength will lie in its ability to learn very quickly and apply the knowledge gained in each consecutive meet," Long said.

Several newcomers figure highly in Long's plans. Besides Goldsmith, others who'll see plenty of action are Jay Friedrich at 150, Jim Morvath at 158, Wayne Rice at 190 and Gary Summer at heavyweight.

THE SALUKIS' GYMNASTICS TEAM won the Windy City Open for the second straight year with junior sensation Gary Morava leading the way in all-around. SIU coach Bill Meade feels Morava is one of the top gymnasts in the country and should again challenge for national honors after finishing second last season.

MORAVA

but Meade feels his squad will again be a strong one.

"We have 11 lettermen returning and with reasonable health we should be in good position to defend our national championship."

Meade says the Salukis will be strong in floor exercise, pommel horse, rings and horizontal bar. The only weak event could be parallel bars.

Top newcomers whom Meade is counting on this season include Lance Garrett, Doug Law, Ross Olson and Gary Goldhart.

DUE TO THE SMALLNESS of his squad in terms of numbers, SIU swimming coach Ray Essick says his Salukis will have to strive for individual greatness in 1973.

"We have some outstanding swimmers," Essick notes, "but we don't have enough of them to be a truly great championship team."

Essick can count on a pair of seniors named Rob--Rob Dickson and Rob McGinley to lead the way in 1973.

DICKSON

an NCAA all-American and he holds the SIU record in the 200-yard freestyle (1:41.9).

Additional strength is expected to come from freestylers Rich Andresen and Fernando Gonzales, individual medley and butterfly racers Steve Dougherty and Geoffrey Ferreira, and three outstanding junior college recruits Randy Geifer, Pat Sullivan and Gary Willis.

Paul Schultz, from Riverside, appears to be an outstanding freshman.

The Salukis have an attractive home schedule, hosting dual meets with Missouri (Jan. 19), Ohio State (Jan. 20), Illinois (Jan. 26) and Indiana State (Feb. 10).

"In order for us to be tough in dual competition," Essick continues, "our individuals will be called on to double and triple in events."

LEW HARTZOG, Southern Illinois University track coach, is generally an optimistic fellow. For instance, he will tell you that he expects great things of his Salukis in 1973. And he has plenty of reasons to feel that way.

Twelve of 'em are the names of track-

Dickson, from Charlotte, N.C., is a three-time NCAA all-American. He finished sixth in the 200-yard butterfly in the NCAA last year after placing third in that event in 1971.

McGinley, from Brookhaven, Pa., also is

sters who qualified for the NCAA championships in Eugene, Ore. last May.

They are high jumpers Bill Hancock and Mike Bernard, triple jumpers James Harris and Phil Robins, sprinters Stan Patterson, Eddie Sutton and Terry Erickson, distance runners David Hill, Jack St. John and Gerry Craig, and members of the Saluki mile-relay Lonnie Brown and Gerald Smith.

Only man missing from SIU's NCAA troupe of a year ago is Ivory Corckett, premier sprinter.

"Crockett was one of the greatest," says Hartzog. "We hate to lose him but I feel with the rest of the team's added year of experience, we'll be better than ever."

Hancock and Bernard are high jumpers of the 7-foot category and Hancock is the school long jump record-holder (25-0 3/4). Harris holds the SIU mark in the triple jump (52-8½) and Robins, only a sophomore, is right behind with a 50-9 effort to his credit.

Patterson, Erickson and Sutton, along with Crockett, were members of the Salukis' record-setting 440-yard relay from last year. And Erickson and Sutton teamed with Smith and Brown to place fourth in the NCAA mile relay.

Miler and three-miler Hill is described by Hartzog as a "world class runner if he wants to be." Hill ran the mile in 4:01.9 and the three mile in 13:35.9 last season.

St. John, although only a freshman in 1972, qualified for the NCAA in two events--the steeplechase and the three-mile run. Craig is an excellent three and six-miler.

"If our athletes perform as well as they are capable, we should enjoy a fine season, perhaps the best in the school's history," Hartzog continues his optimism.

Additional help is expected from the following list of lettermen: pole vaulters Randy Ullom and Guy Zajonc, discus and shot man Kent Kasik, middle-distance runners Gerry Hinton and Al Stanczak, plus newcomers Dan Bulloch, Tom Fulton, Wayne Carmady

and Joe Laws.

FOLLOWING IS THE SALUKI baseball schedule (tentative) for 1973. Home games appear in all caps on the schedule. Weekday single games at home start at 3 p.m., weekday doubleheaders at 1 p.m., Saturday games at 12 noon and Sunday games at 1 p.m.

SIU Sports Information

1925 MILDRED E. SHOMAKER, 2, '43, lives in Belleville where she is a retired school teacher.

1928 ROGER DAVIS, '38, is a retired grade school principal. He and his wife, Naomi, make Venice, Ill., their home.

Mrs. ETTA C. DOUGHERTY, 2, '56, a former elementary music teacher, is now retired and lives in Benton.

1933 MARGARET A. GILLESPIE, 2, '52, lives in New Burnside where she is a primary grade school teacher in the New Burnside School System.

Alumni,

here, there ...

1939 JACK B. SPEAR has received the DeMolay Honorary Legion of Honor, the highest honor that the Supreme Council of the Order of DeMolay can bestow. He makes his home in Albany, N.Y.

ARNOLD L. SUGG, deputy director with the National Weather Service's National Hurricane Center in Miami, Fla., has received the Department of Commerce Silver Medal for his outstanding services to the nation. He, his wife, Julia, and their daughter, Sharon, reside in Coral Gables, Fla.

1941 ODELL MOSELEY is superintendent of the Jonesboro Community Consolidated School District. He, his wife, Edith, and their two daughters, Jennifer and Donna, live in Jonesboro.

1942 Mrs. Rachael Bell (RACHAEL BOST) resides in Murphysboro where she is a retired school teacher.

RICHARD HAMANN is head basketball and track coach at Carrollton High School. He holds a master's degree from Washington University in St. Louis, Mo.

1948 Chaplain WAYNE L. BURKEY has been selected for promotion to colonel

in the U.S. Air Force. He has been assigned to the 96th Combat Support Group at Dyess AFB, Tex.

1950 HUBERT J. LOFTUS, M.A. '51, is the head of his own law firm in Addison. He served as a delegate to the Democratic Convention, representing the Fourteenth Congressional District. A past-president of the Chicago Area Alumni Club, he and his wife, Margaret, have nine children and reside in Addison.

LOFTUS

ERSKINE L. WEBB, M.S. '51, is plant manager with the Commercial Solvents Corporation Plant in Terre Haute, Ind., where he and his wife, EULA M. WEBB '51, make their home.

1951 DOROTHY RUDONI, M.A. '56, Ph.D. '68, is an associate professor of political science at Ball State University. During the fall quarter of 1972, she taught at Soesterberg, The Netherlands, AFB, in the Ball State University/Air Force-sponsored master of arts degree program in public services. At present, she is teaching in the same program but at Air Force bases in Hahn and Rhein Main, Germany.

ROBERT G. STEVENS, president of the Old Stone Trust Company and Old Stone Savings Bank in Providence, R.I., has been elected to the additional position of chief executive officer of that bank. He will also serve as managing trustee of the Old Stone Mortgage and Realty Trust. He and his wife, SUSAN ANN KREJCI STEVENS '55, reside in Providence.

1952 HERMAN ALBERT GRAVES, M.S. '55, is principal of the Marion Junior High School. He, his wife, PHYLLIS JOANN DEWAR '58 and their two children, Kim and Keith, make Marion their home.

LEE R. KOLMER will become dean of the Iowa State University College of

KOLMER

Agriculture and director of its agriculture and home economics experiment station as of March 1. He is presently associate dean of the School of Agriculture and director of the cooperative extension service at

Oregon State University in Corvallis. He and his wife, Jean, have three children, Diane, James and John.

1955 WILLIAM R. TONSO, M.S. '66, is an assistant professor of sociology at the University of Evansville in Indiana.

AURELA L. WEIDNER, M.S. '69, lives in Gillespie where she is a fourth grade teacher.

1956 CONNIE M. CONATSER, M.S. '57, is an assistant professor in the Central Connecticut State College in New Britain. She is a member of the American Association for Health, Physical Education and Recreation.

Deaths

1901 R. C. SLAGLE, Sr., ex, died June 9 in Sherman, Tex. He was a member of the SIU Alumni Association's Legislative Council from 1955 to the time of his death. Survivors include a son and a grandson.

1912 ALBERT B. EDE died October 29 in the Veterans Hospital in Marion. A retired Army colonel, Mr. Ede was active in work for the Red Cross. He was also a board member of the SIU Foundation from 1957 to 1960. Mr. Ede

had served on the SIU Alumni Association's Legislative Council, the Alumni Board for three years and the SIU Athletic Council for 22 years. Survivors include his wife, Bernice, and several nieces and nephews.

1913 Mrs. W. W. Bayley (SARAH MITCHELL, 2) died August 31 in a grade crossing accident. Surviving is her husband.

1920 EGBERT J. TRAVELSTEAD, ex, died October 7 at his home in Buffalo, N.Y. He was a commercial artist. Survivors include his wife, Helen, two sons and three daughters. He was preceded in death by two brothers and his parents.

1937 FRANK HAROLD SISK died June 22 in his home from an apparent heart attack. He was a teacher at Ottumwa High School in Iowa. Survivors include his wife, Virginia, a son and his mother.

1953 VAN W. MOUNTAIN, M.S. '54, died October 24 in his home after suffering a heart attack. He was a school psychologist in the McCoupin County Organization for special education. A past-president of the Macoupin-Montgomery Alumni Club, Mr. Mountain was a former instructor in industrial arts and dean of boys in the Staunton school system. Surviving are his wife, Jean, a son, two daughters and a grandson.

1962 CAROL LEE SWIM died September 20, the victim of a one-car accident in Bemidji, Minn. She held a master's degree from the University of North Carolina and a specialist degree in secondary physical education from Arizona State University. Miss Swim had taught at schools in Roodhouse, at SIU-Carbondale, the University of North Carolina and Oregon State University. At the time of her death, Miss Swim was an assistant professor of women's physical education at Bemidji State College. Survivors include her parents, a brother and a sister.

The Alumni Office also has been notified of the following deaths:

1925 Mrs. Francis Robbins (FRANCES TROUSDALE, 2), San Diego, Calif., July 20.

1947 BILL O. HOYLE, M.S. '48, M.A. '51, Fullerton, Calif., October 29.

1952 JAMES KEITH BENNETT, ex, Golden, Colo.

Your Help Is Needed!

Summer jobs, both part-time and full-time, are becoming more and more important to an ever-increasing number of SIU students. Scholarship and loan funds simply haven't kept pace with student needs in recent years. For many students, summer presents an opportunity to get out and earn more money to finance an education through the rest of the year. At the same time, a summer job can be an educational experience in itself. A full roster of summer jobs in the Student Work and Financial Assistance Office could spell opportunity for a great many SIU students. Summer work can play a great part in career goals and individual maturity.

Information on jobs in federal and state agencies is available, but we need information on job openings in local government agencies and private businesses. We believe that you in the Alumni Association, recognizing that a primary objective of your organization is to help

students, can be of assistance. You may not be in a position yourself to offer summer employment, but if you know someone who is, please let us know. We'll be grateful, and so will a lot of students! Please write or fill out the form below and send today to:

Summer Employment Coordinator
Office of Student Work and Financial Assistance
Southern Illinois University
Carbondale, Illinois 62901
(618) 453-4334

Or, if you live in the Chicago area, write or call the SIU Chicago office:

SIU Information Office
625 North Michigan
Suite 500
Chicago, Illinois 60611
(312) 337-0158

We're Going to Hawaii!

We asked you where you wanted to go on vacation. . .

You told us Hawaii. . .

And that's where we're headed!

There's never been an Hawaiian vacation like this one. You'll have more fun, more service and more downright luxury than any other trip could possibly deliver at any price.

The SIU Alumni Association's fabulous Aloha Carnival 8-day and 7-night vacation is scheduled for March 18-25. And here's what's included in the price:

- 1) round trip flight from St. Louis via American Airlines with food and beverages served aloft
- 2) inflight movies
- 3) complimentary champagne inflight
- 4) traditional flower-lei greeting in Honolulu
- 5) all transfers of you and your baggage between airport and hotel room (tips included)
- 6) pre-registration at hotel
- 7) luxurious accommodations at the Hawaiian Regent (Waikiki's newest and most luxurious beach-front resort—each room has a separate lanai—your choice of restaurants from wine cellar atmosphere to continental dining—swimming pool—cocktail lounges—night clubs—a breathtaking view of the Pacific, Diamond Head and the mountain ranges of Oahu)
- 8) champagne breakfasts every morning—(full American breakfast)
- 9) sumptuous dinners nightly (full-course meals every evening in one of the hotel's outstanding restaurants)
- 10) nightly cocktail parties
- 11) sightseeing tour of Honolulu— $\frac{1}{2}$ day
- 12) optional sightseeing tours available
- 13) Host Escort throughout
- 14) an opportunity to meet and visit with members of the SIU Alumni Club in Hawaii
- 15) your time is your own to spend at your own pace following your own whims

All of this is available for \$399 complete per person double occupancy plus 10% tax and services, much lower than the cost of going without a charter group. You can go for less than the usual fare and better than usual company—SIU alumni! We hope you'll join us. Don't wait too long—there are limited reservations. The trip is limited to members of the SIU Alumni Association at Carbondale and Edwardsville and their immediate families.
